

Installation Instructions Gable Decoration: Style "C"

This gable decoration is shipped in one piece. It will be precut to the pitch specified when the order is placed. You will need to attach it to the overhang.

Installation Instructions

1. It is recommended that you have a helper when attaching your gable decoration to the overhang and follow ladder safety recommendations.
2. Attach your gable decoration to the underside of your fascia through the pre-drilled holes in the side wings using the 2-1/2" screws provided. Make sure the screws set into something solid in your overhang. Depending on your particular installation, it may be necessary to obtain and install longer screws for a solid attachment. It is **not** sufficient to screw into vinyl or aluminum soffit or fascia only.
3. Fill and finish screw heads.
